

400F/DM2 compact instrument quality two channel pump

400 series

Watson-Marlow Pumps

FEATURES AND BENEFITS

- Spring loaded fully adjustable track for adaptability to various pressure conditions and maximising tube life
- Accepts standard three bridge colour coded auto-analysis tube elements available in 19 sizes
- Wide range of gear motors available
- Extremely compact design
- Flow rates up to 36 ml/min

Watson-Marlow...Innovation in Full Flow

The standard DC 5W motor is our most compact instrument quality motor. This motor silent operation, long brush life and excellent speed regulation with our controllers (optional).

The economy DC 5W motor offers small size and high value for money. It is primarily intended for intermittent duty applications.

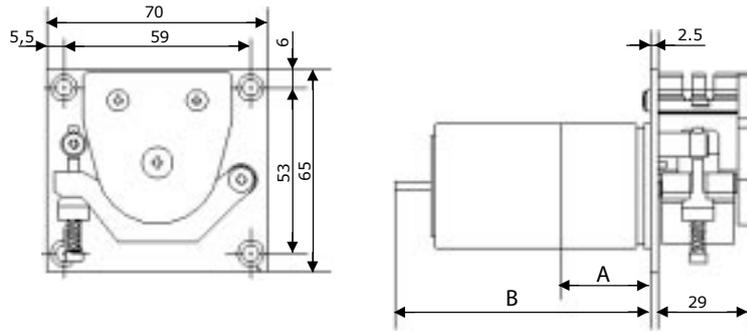

The brushless DC 5W motor is a 1 phase 2 core reluctance motor with a 4 pole ferrite magnet. Hall sensors and commutation electronics are integrated. No carbon brushes yields an extremely long life with no maintenance required. Speed is regulated by varying the 24 VDC supply.

The synchronous AC 2W motor runs on mains voltage. The motor speed is based on supply frequency giving a very accurate and reproducible motor speed.
